

## BENEFITS

Should you buy a remanufactured component or repair your existing component?

### REMANUFACTURED

- Components are remanufactured using approved manufacturers and the latest technology.
- Components are completely disassembled; individual parts are cleaned, inspected, and brought back to spec or replaced with new parts.
- Using modern manufacturing practices and assembly techniques, trained technicians assemble new and remanufactured parts into final remanufactured components. Engineering updates are included for Cat® lift truck products.
- All finished products are tested to insure performance.
- Product is stocked and readily available – minimal down time.
- Six months – unlimited hour warranty.

### REPAIR

- Only failed parts are repaired or replaced. Other worn parts may cause the component to fail again.
- Limited or no special tooling and technical training.
- Extended lift truck downtime for repair to occur.
- Repair parts are not always tested to original specs and do not include product updates.

### REMANUFACTURED PARTS AVAILABLE

Alternators • Armatures • Control Panels and Logics • Cylinder Heads • Differentials  
Displays • Electric Motors • Engines  
Hydraulic Control Valves • Hydraulic Pumps  
Starters • Steer Axles • Steer Cylinders  
Steer Gears • Tilt Cylinders • Torque Converters  
Transmissions • Water Pumps  
Transmission and Engine reman kits

## REMANUFACTURED COMPONENTS

Promatch® remanufacturing is more than repairing or reconditioning. The latest manufacturing techniques and procedures are used to restore used parts, components, or units. Components are completely disassembled, cleaned, and inspected. Certain parts including wear parts are replaced with top quality new parts. Other parts are remanufactured to be consistent with the original part manufacturer's specifications.

Remanufactured components are then assembled using manufacturing processes equivalent to those specified by the original part manufacturer and tested to comply with the original manufacturer specs. The result is a product that performs.

You are assured quality when our products are combined with the service expertise of Cat® lift truck dealers – an unbeatable combination of quality and value.

We go the extra mile so your lift truck will too.

- Engines are started, run to operating temperatures, and tested. A copy of the test is included with each engine.
- Our remanufactured electric motors are U.L. recognized.
- Frequent vendor product audits are performed to assure quality and continuous product improvement.
- Cylinder heads come complete and include head and valve cover gaskets.
- Engines include a free oil sample kit.
- Starters and alternators are load tested.
- Visual core criteria ensure the rapid calculation of core value.

If you would like more information about our remanufactured products or are looking for the location of your nearest Cat lift truck dealer, call (800) CAT-LIFT or visit our website at [www.cat-lift.com](http://www.cat-lift.com)
